WHY STILETTO TITANIUM HAMMERS?

MORE PRODUCTIVITY

Titanium delivers 97% of your swing energy to the nail compared to 70% with Steel hammers. Get more done with less effort!

LESS ARM PAIN

Titanium provides 10 times greater dampening of damaging recoil shock vibration than Steel. Less recoil means less pain.

LESS FATIGUE

Titanium weighs 45% less than a Steel hammer of similar size. Less weight means less fatigue at the end of a long workday.

PATENTED STILETTO TECHNOLOGY

Stiletto Titanium Tools are designed to reduce the harmful effects that nailing and prying can have on your body. Stiletto has combined the latest materials, patented technology & design innovations to create new tools that enable you to work *safer, faster and easier*.

*Patented Repl. Steel Face
& 180° Nail Puller on
TiBone™ models only*

*Patented Staple Puller
on Ti and Stainless
15" & 11" Flatbars*

*Patented Dimpler™
feature on ClawBar™
model only*

Since 1849, Stiletto has been the "Standard of the West", and today we strive to preserve our tradition of providing the trades with the highest degree of quality in our products and our customer service.

Stiletto Titanium hammers give you the ability to work hard without risking potentially game-ending injury to your hand, wrist & elbow, & without the same old arm fatigue and the end of every day. You'll have to feel the difference for yourself. Ask a Stiletto user about it, or read the user testimonials online. What's *your arm* worth to you?
