**Firm Grip.** Having trouble maintaining a good grip on your hammer? Check out the *AirGrip* handle wrap from titanium-hammer-maker Stiletto. You slide the rubber grip over the handle while pulling out its plastic insert, which is wound like a spring; the rubber then shrinks around the handle. The maker claims the wrap won't work loose and can also be used with long-handled tools like shovels and sledges. It sells for \$13. Stiletto, 800/987-1849, [www.stiletto.com](http://www.stiletto.com).
