## STILETTO TOOLS 14-OZ. TITANIUM HAMMER

Try it: If you have a bum elbow, like Andrea, yet need to do extensive remodeling, try this super-light bad boy. Made of titanium, it's half the weight of traditional steel hammers and has ten times less damaging recoil. For more control while installing trim and molding, pick the 10-ounce size; use the 14 ounce for working with 2x4's or roofing. Both have a long, curved, ax-shaped handle for comfort. (Stiletto has, after all, been around since the California Gold Rush days.) Careful, though: In an extreme situation, the wood handle could split with a hard blow to a surface edge, so always keep your eye on the nail! Nice large head, too.

Buy it: 10 ounce \$60; 14 ounce \$80. 800/897-1849; [www.stilettotools.com](http://www.stilettotools.com).
