DALLAS

Bathroom Remodeling

Does your elbow get stiff when you swing a hammer? Mine does. That's why I like the new Titanium hammer from Stiletto Tools. It's much lighter weight than conventional hammers and built to last whether you're a weekend warrior or a professional carpenter. Another neat item from Stiletto is the Dimpler.

The Dimpler's special tip digs into difficult nail-pulling jobs and makes them easier. A must-have for the carpenter on-the-go. And lastly, Stiletto has created the Handle Grip, a cool-shrink rubber handle that will fit over any tool handle. It's perfect for old tools that have splintered handles, wheelbarrows, or grips of any type. The Handle Grip is also fun to install. Let your Valentine help you. They'll get a kick out of it! Drop by StilettoTools.com for purchasing info.
